

THE CRUZE 970

CORSAIR

MARINE
INTERNATIONAL

The Cruze 970 combines the performance of the award winning Corsair C31 with the spacious comfort of the Corsair 37! The Cruze is an exciting boat with great sailing pedigree and packed with fantastic features - the Cruze 970 is our very latest model from the design team at Corsair Marine.

Origin

Corsair built over three hundred C31's and delivered them to locations all around the world where our customers have sailed this tough proven performer in a wide range of conditions. In 2010, a C31 Ultimate Cruiser owner even sailed around the Arctic Circle and in the process, became the world's first sailing vessel, a Corsair trimaran, to complete the North West and North East Passages in a single season.

Corsair trimarans can go anywhere!

With customer demand to modernize the C31, the Cruze 970 was an evolution taking key design aspects from the C31 and responding to customer need for increased comfort and amenities, more in line with our C37. We take pride in that we have achieved this winning combination with a great new compact model and at a very competitive price.

With over 30 years of continuous trimaran production totaling over 2000 boats launched through our global dealer network, you can be assured that your decision to choose a Corsair trimaran is backed up by a proven warranty and service package.

Speed and performance, safety, reliability and ease of trailering are features for which the Corsair brand is widely famous. Naturally these features are integral to the Cruze 970. Our modernized design focuses on the people and the families who will sail on it and it is far more accommodating for the needs of partners, guests and children on board whilst still retaining excellent sailing performance.

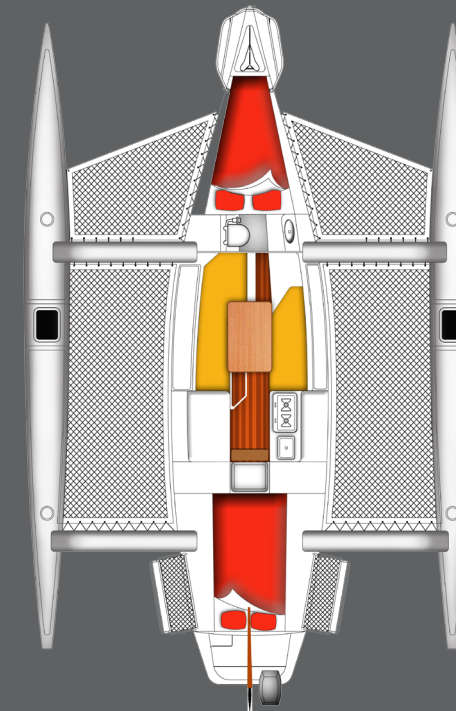

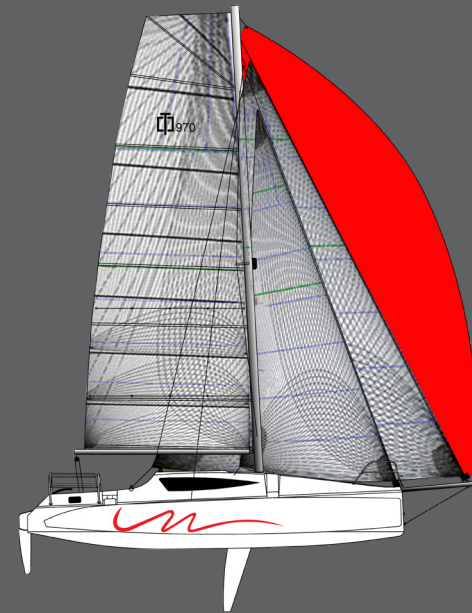

The 970 is slightly longer than the previous C31 and the deck has been raised creating approximately 15% additional space inside. Most importantly, there is full standing headroom in the saloon area.

The beautiful saloon area is finished with a clean, white GRP liner. The galley area is larger with additional drawers and ample storage. The forward and aft bunks are longer and wider than the C31 giving more generous accommodation area for crew. The Cruze 970 also caters for privacy with a fully enclosed head.

The functional cockpit has been extended and a transom mainsheet track facilitates free movement within the cockpit. The raised side seating increases both comfort and visibility - a great design feature taken from the highly successful C37.

For sailing performance, the floats have been designed with additional buoyancy giving the CRUZE 970 great stability and comfort for all her passengers.

Corsair's folding system is world renowned and trusted to ensure that trailering remains easy. The retractable dagger board and rudder enable the boat to be pushed up on the beach when enjoying cruising adventures with family and friends.

Dimensions

- LOA: 31' 10" (9.7m)
- LWL: 31' 10" (9.7m)
- Beam: 22' 7" (6.88m)
- Beam folded: 8'4" (2.55m)
- Draft (hull only): 1' 5" (0.45m)
- Draft D/B down: 6' 10" (2.1m)
- Mast Length: 39' 6" (12m)
- Mast height above waterline: 44' 11" (13.7m)
- Unladen weight: 3,999lbs (1,814kgs)
- Hull: FRP with PVC core
- Max. recommended auxiliary: 20 Hp Yamaha 4 stroke high thrust extra long shaft
- Mainsail: 418 sqft (38.8m²)
- Jib: 218 sqft (20.2m²)
- Screecher: 449 sqft (41.6m²)
- Spinnaker: 996 sqft (92.2m²)

- Transom ladder with pressurised fresh water shower
- Stainless double pushpit seats with tiller extension offering comfortable helm position
- Robust wing nets, hiking straps and bow nets for added safety
- Rotating aluminium wing mast
- Built to International/European standards (CE)

“ The Cruze 970 has stayed true to its family DNA and kept all the qualities of the 31. It is a true sporty trimaran – as nimble and fast as its older siblings but with improved float design, a more powerful mainsail and a more comfortable interior. Welcome to the next level! ”

Andreas, Corsair Owner from Vienna, Austria

“The Cruze 970 is roomier with more focus on comfort without sacrificing performance.”

Robert H. Perry
(Designer/ Marine Journalist)
